I think a call to R8 would be beneficial. They may need inorganic lab capacity.

I did call Don Goodrich this morning and left a message. SMO hasn't contacted CHM yet, and I asked them to wait until we have the discussion with R8. I have a cell # for Don, and could try that. His v-mail said he is in thru Thurs.

So I am thinking a call to the R8 RSCC is in order to see if this work is still going ahead as planned or will be postponed for a bit given the Gold King mine incident and response.

Usama,

Please ask CHM whether they are willing to be scheduled over their capacity by approximately 18% for the samples in this case.

Thanks,

All,

For scheduling on August 6, 2015, we have one project that requires direction for additional samples. Currently, there are 70 soil SPLP ICP-AES 11+ Metals and Mercury samples scheduled with TAB. Shipping has not started yet for this Case and the Region would prefer to have all samples scheduled with one laboratory, if possible. The Region has also indicated that shipping will occur on one day during the shipping period. Below are the Case details and a table summarizing the laboratories status, funding, and additional comments for this project. This table is also included as an attachment.
